

If my anti-virus prevents YFCAD software's installing, what can I do?

Answer:

In some cases, you can modify the setting of the anti-virus, and put all YFCAD programs to the trust list, and YFCAD software can be installed.

If there is no trust list in your anti-virus, you have to report to YFCAD headquarter, and we will officially contact the anti-virus company and ask them to authenticate YFCAD program.
