

1. In customized ceiling module>background wall design;

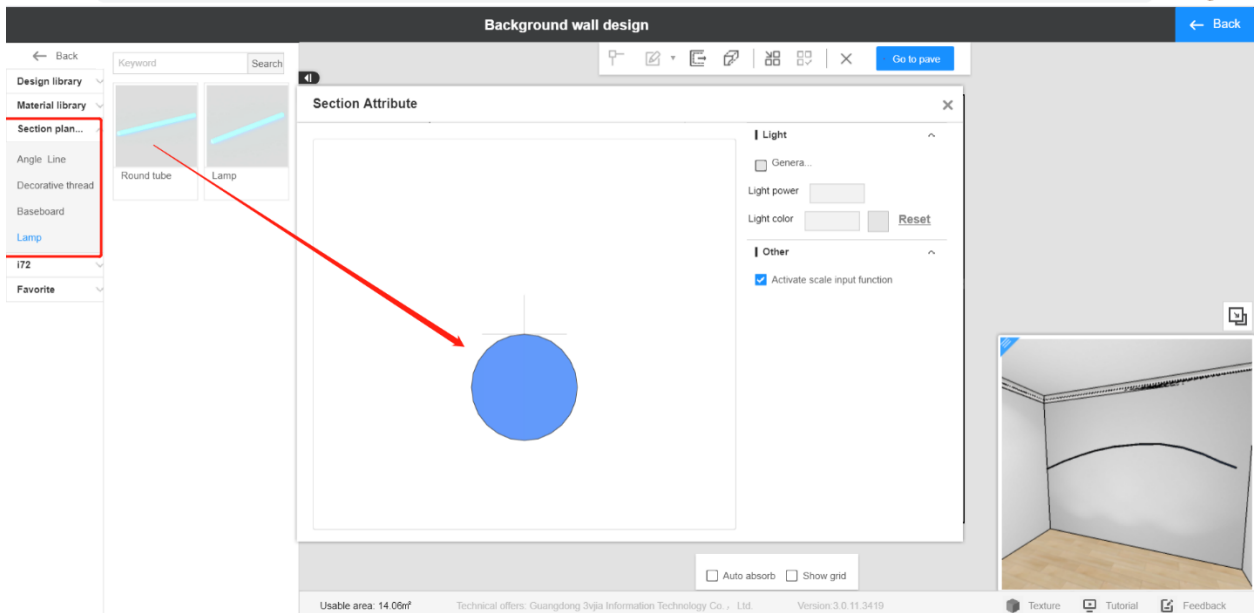

2. Use polyline to draw the curve, please turn off the auto absorb when you draw, so that you can draw curvy lines instead of straight lines.

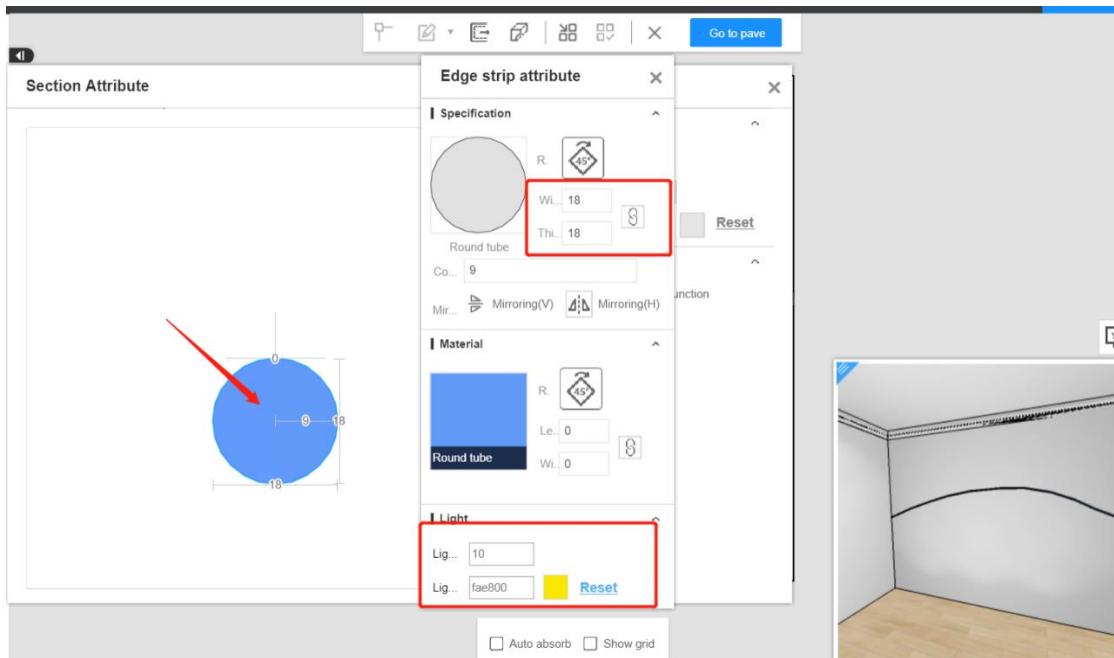

3. Right click when you done drawing. Click on the polyline, click edge strip

4. On the left library, go to section plan> lamp, drag the round tube/lamp into the Section Attribute window.

5. Click on blue lamp icon, you may then adjust the lamp power, color, and the lamp tube size

6. This is the final output after render.
